(54) INFORMATION PROCESSOR AND ICON
DISPLAY METHOD THEREFOR

(57) Abstract:

PROBLEM TO BE SOLVED: To grasp the original attribute of a data file even though the conversion of data is performed for the data file.

SOLUTION: When an icon is displayed in response to the file data which are stored in a storage, it is decided whether the data stored in the storage are converted (S302). If the conversion of data is decided, the attribute of the unconverted data is acquired (S304). Then a correction icon of a shape in accordance with the acquired data attribute and its conversion is produced (S305). The produced correction icon is shown on a display screen.
